

**NASH HANDBOOK:
DESIGN OF RESIDENTIAL & LOW-RISE STEEL FRAMING (2009)**

Corrigenda

Page 50 Replace the diagram for *Fig. 5.4 - Illustration of the relationship between a load acting along the ridge line and tension in the strap bracing* with:

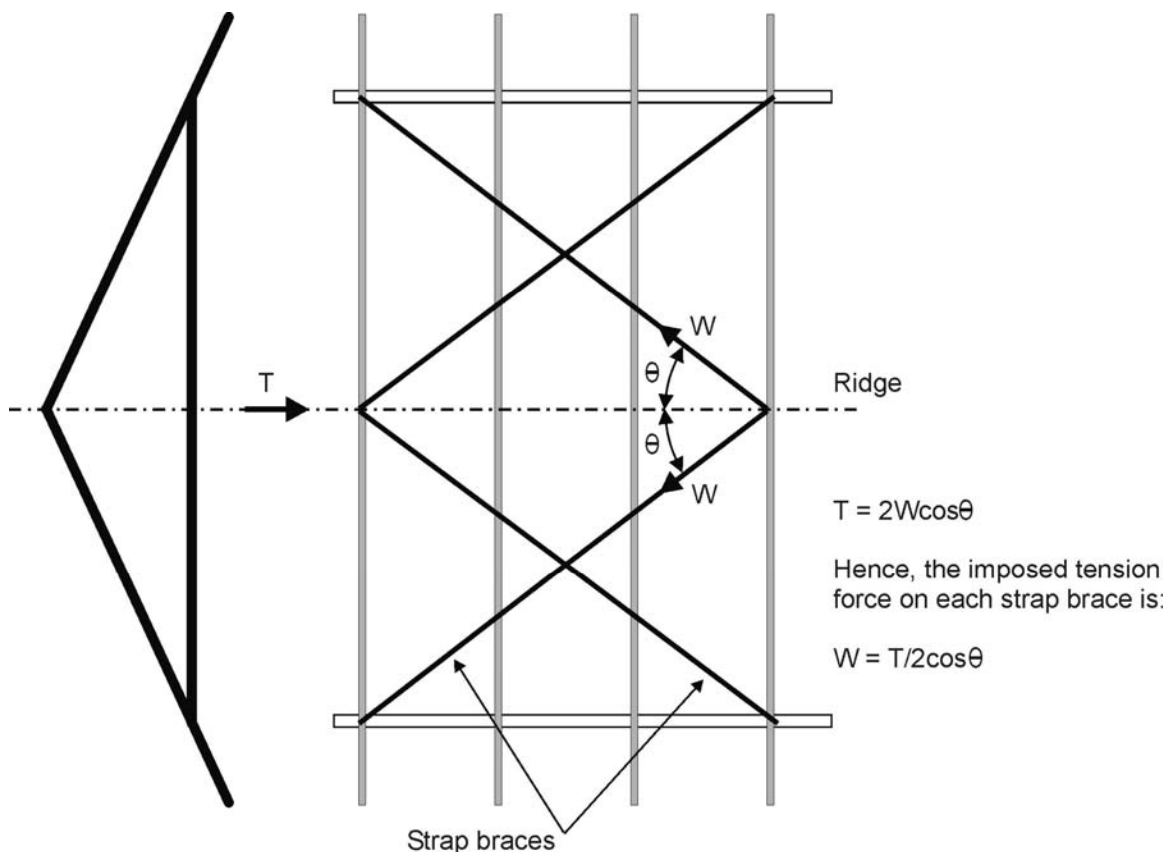

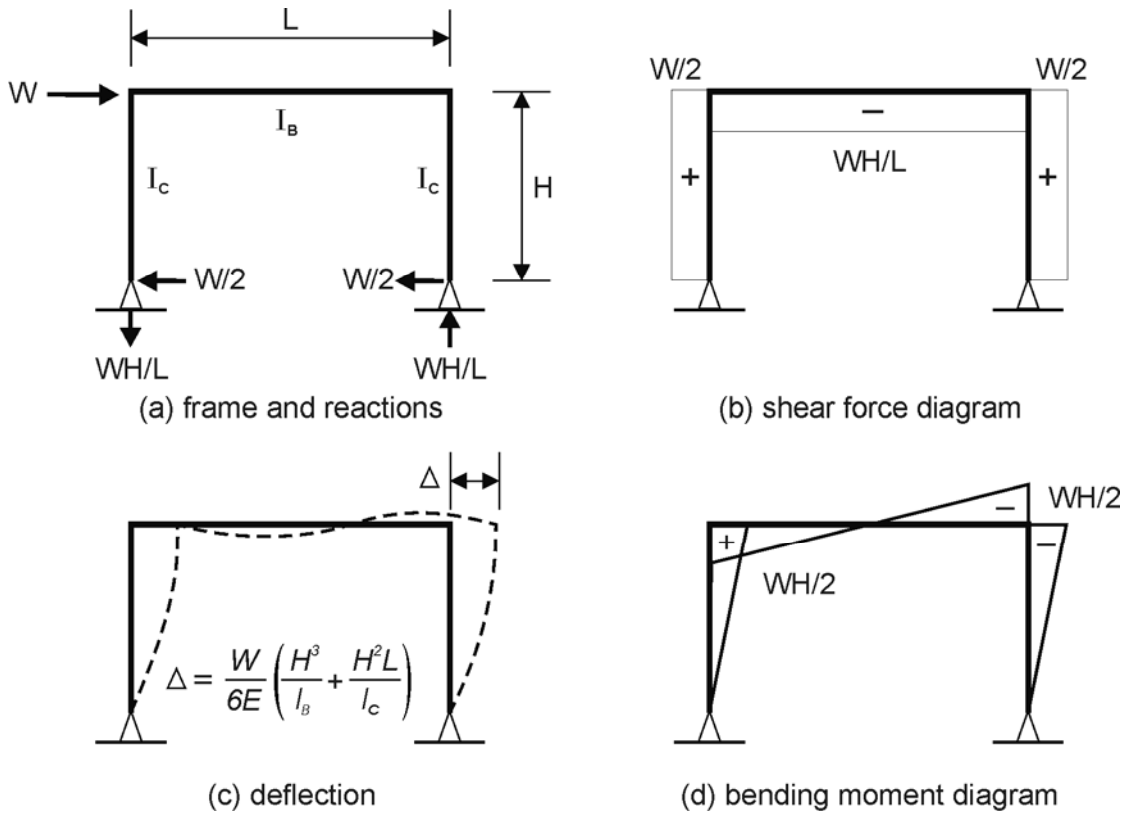

Fig. 5.4 Illustration of the relationship between a load acting along the ridge line and tension in the strap bracing

Note: I_b and I_c refer to the moment of inertia of the beam and columns, respectively, and E is the modulus of elasticity.
